**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 15 May 2010.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**DETAILED ACTION**

***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 5/15/2010 has been entered.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 10, 13, and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Harless et al. (US-5145240).

Regarding claim 10, Harless discloses a single valve (44 or 140) only connected (37) to a trailer compressed air supply line (16), said single valve being capable of: permitting passage of compressed air through said trailer compressed air supply line to a braking system when said single valve is in a closed state (col. 4, lines 27-56.); and, means for exhausting air present in said compressed air supply line from said single valve through an exhaust line when said single valve is in an open state (col. 4, lines

27-56); and a housing (40 or 112) for said single valve, said housing being connected to a trailer braking system and accessible via a lockable door (col. 4, lines 25-26).

Regarding claim 13, see ball valve (140, ball 144, embodiment fig 4/5).

Regarding claim 15, Harless discloses lever (54 or 129).

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 16 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Harless et al. (US-5145240) in view of Kee et al. (US-6367888)

Regarding claims 16 and 17, Harless discloses as set forth above but lacks a key pad and GPS device. Kee et al. teaches a housing (25) connected to a brake system via a lockable door (col. 5, lines 45-48), a lever (75), a keypad for operating the lockable door (col. 2, lines 32-35), a GPS signal for identifying the location of the trailer and remotely operating the system (fig 6).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to combine the air brake/alarm system of Harless with the air

brake/alarm system of Kee et al. because the features of Kee et al. provide further security measures and prevent theft.

***Response to Arguments***

6. Applicant's arguments with respect to claim 10, 13, and 15-17 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to JAMES K. HSIAO whose telephone number is (571)272-6259. The examiner can normally be reached on Monday through Friday 8:30 am to 5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Siconolfi can be reached on 571-272-7124. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
